(3) that gamma rays induction in rice genome can create point mutation such as deletion or substitution of nucleotide. Based on data of nucleotide sequences analysis are frequently found deletion of nucleotides around 1-16 bp.
27-33	Not standard English (not understandable)	Correction: Kovach et al., (4) mention that a close evolutionary relationship between Basmati variety and the <i>Japonica</i> gene pool, but recent report also mention that it is not only one of badh2 gene has responsibility for fragrance in rice, but the possibility there are another pathway for biosynthesis of 2-Acetyl Pyrroline (5)
